RE: Station WMNY(AM)  
Elloree-Santee, South Carolina

Dear Ms. Searcy:

By letter dated January 12, 1990, the undersigned, on behalf of Clarence E. Jones, licensee of Station WMNY(AM), Elloree-Santee, South Carolina, requested that Special Temporary Authorization be granted for the operation of the Station with parameters at variance from its license for an initial period of 90 days. In the letter, the undersigned described the reradiation of the Station's signal being experienced as a result of the construction of a ready-mix cement factory and associated power line facilities adjacent to the Station's transmitting facilities. As indicated in the letter, the licensee is in the process of attempting to seek appropriate remedies directed toward resolution of the reradiation problem.

The Commission's staff has requested additional information, which is herein provided. With respect to the tower for the ready-mix cement factory, Mr. Jones intends to pursue two avenues of redress. First, he intends to file a complaint with the Commission based on the facts that the cement factory's tower supports a private radio facility and that, under long-standing policy, the owner is required to take whatever steps are necessary to protect the signal of the AM station from interference caused by the construction of a new structure. Second, Mr. Jones intends to seek appropriate relief in federal court against the cement factory owner. At the same time, Mr. Jones also intends to pursue appropriate relief in federal court against the owner of the power lines, the South Carolina Electric and Gas Company.

FLETCHER, HEALD & HILDRETH

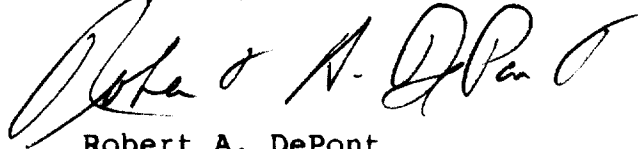

Ms. Donna R. Searcy  
February 23, 1990  
Page Two

The legal papers in support of Mr. Jones's position are now being prepared and is anticipated that formal action before the Commission and in the courts will be instituted in the very near future. While the ultimate timing of these matters cannot be predicted, it is hoped that they will be resolved expeditiously. Of course, the Commission will be kept apprised as to the progress of these matters.

Should any questions arise concerning these matters, please communicate directly with the undersigned.

Very truly yours,

FLETCHER, HEALD & HILDRETH

RE: Request for Special Temporary  
Authorization-Station WMNY(AM)  
Elloree-Santee, South Carolina

old-WGZS

Dear Ms. Searcy:

On behalf of Clarence E. Jones, licensee of Station WMNY(AM), Elloree-Santee, South Carolina, it is respectfully requested that Special Temporary Authorization be granted for the operation of the station with parameters at variance from its license. The basis for this request is as follows.

Station WMNY(AM) is licensed to operate directionally at 5000 watts. Pursuant to a modification of the facilities to accommodate the antenna for Station WMNY-FM, Elloree, South Carolina, Mr. Jones filed an application for direct measurement of power on July 5, 1989 (File No. BZ-890705AB). By letter dated August 14, 1989, the Commission dismissed the application and directed the applicant to submit an acceptable partial proof within 60 days. Pursuant to an extension request dated October 6, 1989, the applicant was subsequently directed to file the partial proof by January 15, 1990.

It has been determined, however, that the taking of additional proof of performance measurements at this time would serve no useful purpose. In the summer of 1989, a tower for a ready-mix cement factory and associated power line facilities were constructed next to the site of Station WMNY(AM)'s transmitting facilities which resulted in reradiation of the Station WMNY(AM) signal altering the station's pattern. Upon bringing the matter to the attention of the Commission's field office in

FLETCHER, HEALD & HILDRETH

Ms. Donna R. Searcy  
January 12, 1990  
Page 2

Atlanta, Georgia, Mr. Jones was advised to take steps, including reducing power if necessary, which would ensure that the station's monitor points were maintained within authorized limits. Mr. Jones did so and the station has been so operating since that time. In light of his discussion with the Commission's field office, Mr. Jones was not aware that there was a need to separately notify the Commission in Washington, D.C.

On January 11, 1990, the fact of the station's operation at variance with its licensed parameters was brought to the attention of the undersigned counsel and representatives of the consulting engineering firm of du Treil, Lundin & Rackley, Inc. Upon consultation with undersigned counsel and the du Treil firm, it has been determined that taking further measurements of the station's pattern at this juncture would serve no useful purpose because of the existence of the reradiation described above.

Mr. Jones is currently in the process of attempting to seek appropriate remedies directed toward resolution of the reradiation problem. Until the problem can be resolved, however, it is requested that the Commission authorize continued operation of Station WMNY(AM) with parameters at variance while maintaining monitoring points within authorized limits. Such authority is requested for an initial period of at least 90 days.

Please send notification concerning action on this request to:

Mr. Clarence E. Jones  
Radio Station WMNY(AM)  
Route 1, Box 189  
Santee, South Carolina 29142-9718  
Telephone: (803) 854-2671

Please send a copy of such notification to the undersigned.

FLETCHER, HEALD & HILDRETH

Ms. Donna R. Searcy  
January 12, 1990  
Page 3

Should any questions arise concerning this matter, please  
communicate directly with the undersigned.

Very truly yours,

August 14, 1989

Clarence E. Jones  
Radio Station WQZS (AM)  
Rt. 2, Box 537  
Ridgewood, SC 29048

This refers to your application for direct measurement of power, File # EZ-890705AB. Preliminary review indicates that the partial proof of performance measurements do not comply with section 73.154 of the FCC rules because an insufficient number of radials were measured. It is necessary that measurements be made on each of the radials established in the latest complete proof of performance of the directional antenna system. Accordingly, your application is hereby **DISMISSED** as being patently defective. Failure to submit an acceptable partial proof on FCC Form 302 within sixty (60) days may result in reduction of your operating power.

/s/ Gary R. Thayer

## POST-FILING ANNOUNCEMENT

On February 11th, 1982 WMNY was granted a license by the Federal Communications Commission to serve the public interest as a public trustee until Dec 1, 1988.

Our license will expire on Dec 1 1988. We have filed an application for license renewal with the FCC.

A copy of this application is available for public inspection during our regular business hours. It contains information concerning this stations performance during the last license term, February 11, 1982 through December 1, 1988.

Individuals who wish to advise the FCC of facts relating to our renewal application and whether this station has operated in the public interest should file comments and petitions with the Commission by November 1 1988.

Further information concerning the Commissions broadcast license renewal process is available at Rt 1, Box 189, Highway 6, in the public inspection file, or may be obtained from the FCC, Washington, DC 20554.

This is to certify that the above announcement was broadcast on the dates and times shown below on WMNY, Elloree-Santee, SC:

August 1st 405 PM (4/6pm)

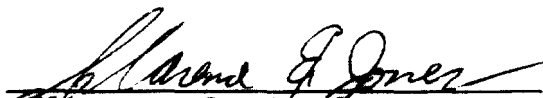

August 16th 405 PM (4/6PM)

September 1st 410 PM (4/6pm)

September 16th 410 PM (4/6pm)

**FILING INSTRUCTIONS**

Broadcast station licensees are required to afford equal opportunity to all qualified persons and to refrain from discriminating in employment and related benefits on the basis of race, color, national origin, and sex. See Section 73.2080 of the Commission's rules. Pursuant to these requirements, a license renewal applicant who employs five or more full-time station employees must file a report of its activities to ensure equal employment opportunity for women and minority groups (that is, Blacks not of Hispanic origin, Asians or Pacific Islanders, American Indians or Alaskan Natives, and Hispanics). If minority group representation in the available labor force is less than five percent (in the aggregate), equal employment opportunity (EEO) program information for minority group members need not be filed. However, EEO program information must be filed for women since they comprise a significant percentage of virtually all area labor forces. If an applicant employs fewer than five full-time employees, no equal employment opportunity activity information need be filed.

A copy of this report must be kept in the station's public file. These actions are required to obtain license renewal. Failure to meet these requirements may result in license renewal being delayed or denied. These requirements are contained in Section 73.2080 of the FCC Rules (47 CFR 73.2080), and are authorized by the Communications Act of 1934, as amended.

If your station employs fewer than five full-time employees, check the box at left, complete the certification below, return the form to the FCC, and place a copy in your station's public file. You do not have to complete the rest of the form.

**If your station employs five or more full-time employees, you must complete all of this form and follow all instructions.**

If minority group representation in the available labor force is less than 5 percent (in the aggregate) and you choose not to file EEO program information for minority groups, check the box at left and complete the rest of this form with only the information for your program directed towards women.
